Buzzing from AAIS Primary

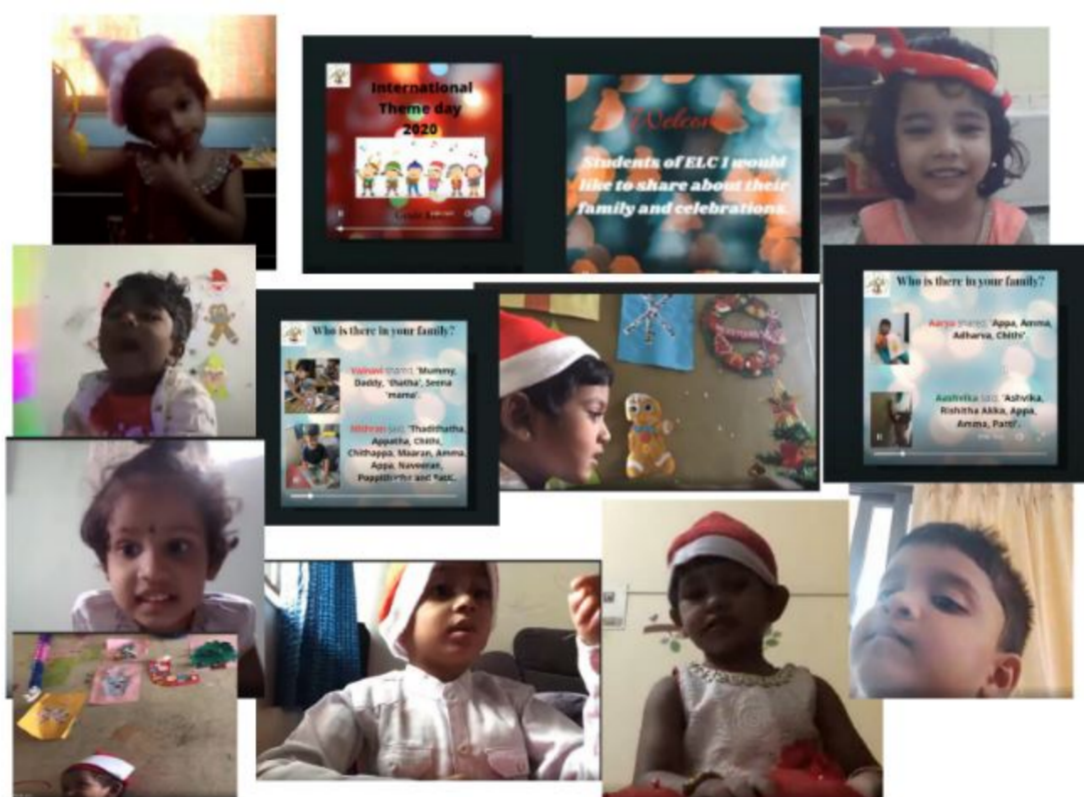

While the last month of 2020 continued to be an action-packed time at School, with the Virtual Sports Day 2020, Christmas Celebrations in the various classes, we hope all of you had the much-needed down-time over the last week of the year as we ushered in 2021 - a year of new beginning, new hopes and new dreams!

For those of you who missed the wonderful conversation we had with Mr Sharath Kamal, 9-time National Champion, as part of our Sports Day celebrations, do catch it [here](#). Some wonderful life lessons to reflect upon and learn from.

"Connection : The understanding that we live in a world of interacting systems in which the actions of any individual element affect others." - Making the PYP Happen: A Curriculum Framework for International Primary Education, IBO 2007 & 2009.

Remember how Grade 2 raised the curtain on the International Theme Day Celebrations 2020, demonstrating the connections they had made between the Earth's physical geography and the way people live around the world?

We had our youngest learners of ELC1 follow suit, in December, as they connected their learning to Christmas and shared it with their parents, as a fitting celebration of the festivity in the air!

Grade 1 is up-next on Monday, January 11, as they explore the connection between the Earth's natural cycles and our daily activities as living beings on Earth. Do catch them on the School's [FB Live Channel](#) at 5PM on Monday, January 11, 2020.

Following Grade 1, we would have Grade 5 present the connections they have made, as part of their Research for the PYP Exhibition. This event, that serves as a pre-cursor to the PYP Exhibition to be held in March 2021, will be held on January 19 and January 20, 2021.

Shhh.....we are not letting the cat out of the bag yet! So, this will be an exclusive presentation for the parents of Grade 5; but don't you fret! We will share a peek into this at a later date for you all to see!

Curiouser and Curiouser

The final piece of the three-part series on "What is Inquiry?" is up on the AAIS Blog. In case you did not catch it yet, do click [here](#) to read the final piece of this series.

Did you miss Part 1 and Part 2? Do click [here](#) to read Part 1 and click [here](#) to read Part 2.

Don't forget to leave your comments. We look forward to hearing back from you!
